SUMMERY

I am Full Stack .NET Developer with a solid foundation in software engineering and modern web technologies. Specialized in building end-to-end applications using ASP.NET Core, C#, and SQL Server. Expert in designing relational databases with EF Core and creating responsive, user-centric interfaces with Bootstrap and JavaScript. Demonstrated ability to deliver complex systems, including automated media management and secure identity solutions. Committed to writing clean, maintainable code and staying at the forefront of back-end architecture and performance optimization.

EDUCATION

Bachelor of Computer Science

Expected Graduation: 2027

- **Misr Higher Institute for Commerce and Computers**
- **Expected Graduation: 2027**

INTERNSHIP

- **Backend .NET Trainee – DEPI (Digital Egypt Pioneers Initiative)** **Dec 2025 – Present**
 - Currently enrolled in an advanced backend-focused training program.
 - Working with ASP.NET Core, REST APIs, SQL Server, Entity Framework, and authentication.
 - Building scalable backend systems and applying clean architecture principles.
 - Improving debugging, deployment, and software engineering best practices.
- **Full Stack PHP Intern – NTI (National Telecommunication Institute)** **Aug 2025 – Sep 2025**
 - Completed an intensive Full Stack PHP training program.
 - Developed dynamic web applications using PHP and MySQL.
 - Implemented backend logic, CRUD operations, and database integration.
 - Worked on front-end and back-end communication.
- **Full Stack .NET Intern – Mansoura University Training Program** **Jul 2024 – Sep 2024**
 - Completed a hands-on Full Stack .NET training program.
 - Built web applications using ASP.NET, C#, and SQL Server.
 - Implemented CRUD operations, authentication basics, and API integration.
 - Applied OOP principles and database design concepts.

WORK EXPERIENCE

HighTech E-commerce Platform (Z-Tone Technology)

February - March 2026

- **Core Engine:** Built a full-stack E-commerce system using ASP.NET Core MVC and EF Core with a secure SQL Server database.
- **Smart Admin Panel:** Developed a dashboard for inventory management supporting EAN codes, product galleries, and Hot Deals logic.
- **File Management:** Implemented an automated server-side file system for dynamic product image organization and retrieval.
- **Security & UI:** Integrated ASP.NET Identity for user auth and built a Responsive UI with Bootstrap 5 and JavaScript.

SKILLS

- **Technical Skills:**
 - Back-End: C#, ASP.NET Core, Web API, ASP.NET MVC, LINQ, Identity, Entity Framework Core.
 - Front-End: HTML5, CSS3, JavaScript.
 - Databases: SQL Server.
 - Programming Fundamentals: OOP, Data Structures, Algorithms, C++, Java
 - Tools & Methodologies: Git/GitHub, Agile/Scrum.
